DESCRIPTION

UV canopies suitable for wall or ceiling mounting and can have an added capture vent technology. The canopy includes an integral UV section connected to the filter plenum to produce ozone to neutralise cooking odours. The UV section is out of the airstream so bulbs are protected from grease prolonging their lifespan, the UV section has external access to make changing the bulbs an easy process for maintenance engineers.

KEY FEATURES

- Neutralise cooking odours
- Longer bulb lifespan due to no contact with grease
- Bulbs can be easily replaced
- Concealed compartment for UV Lights giving effective protection from the UV.
